So I finish my shift, go home and take a couple of **8mg** cocodamol and blather my tooth in oragel. Go to sleep, wake up and take 2 more. By the time I start the night shift the pain has gone, at least enough that a couple nurofen do the job. You can buy low strength co-codamol, containing 500mg paracetamol with either **8mg** or **12.8mg codeine**, over the counter from pharmacies for: Short-term relief (up to three days). Co-codamol is available in different doses. They all contain 500mg of paracetamol (the same as one regular paracetamol tablet or capsule) but the dose **of codeine** varies and can be **8mg**, 15mg or 30 mg. The dose that is right for you will depend on the amount you need to control your pain. They contain **8mg**, 15mg or 30mg **of codeine**. All 3 strengths contain 500mg of paracetamol - the same as in a standard paracetamol tablet or capsule. The strength of co-codamol appears as 2 numbers on the packet. For example, 8/500 means each tablet or capsule contains **8mg of codeine** and 500mg of paracetamol. **Codeine** phosphate is an opioid analgesic with uses similar to those of morphine, but is **much** less potent as an analgesic. Its primary site of action is at the mu opioid receptors distributed throughout the central nervous system. The sedative activities **of codeine** are less potent than those of morphine 13. • Available as **codeine** phosphate tablets 15mg, 30mg and 60mg and as liquid preparations 15mg/5ml and 25mg/5ml. • Also available in combination with paracetamol **8mg/500mg**, 15mg/500mg, 30mg/500mg . • **Codeine** must be metabolised to morphine to achieve most of its analgesic effect. **Codeine** phosphate is a weak analgesic and is used in the treatment of cough and diarrhoea. Paracetamol's effects are thought to be related to inhibition of prostaglandin synthesis. **Codeine** is **much** less potent than morphine and it is inadequate against severe pain even in the largest tolerable doses. They contain **8mg**, 15mg or 30mg **of codeine**. All 3 strengths contain 500mg of paracetamol - the same as in a standard paracetamol tablet or capsule. The strength of co-codamol appears as 2 numbers on the packet. For example, 8/500 means each tablet or capsule contains **8mg of codeine** and 500mg of paracetamol. It can start at .5 mg for every pound of body weight and go all

the way up to **1.8mg** per pound. This is given by mouth every 8 to 12 hours. The dosage and the times to administer are determined by the condition of your pooch. Dosing will also vary according to the amount of pain he or she is in. Compare prices, print coupons and get savings tips for Dilaudid (Hydromorphone) and other Pain drugs at CVS, Walgreens, and other pharmacies. Prices start at \$11.83
