HVAC systems, some of which are made by Trane, are the heating and cooling systems that regulate temperature in homes and buildings. 8 dec. 2011. I have the same trane Xr12 and the compressor isn't kicking the heat on. There is a light blinking on the circuit - Answered by a verified . Your heat pump's outdoor coil is typically 10 to 20 degrees colder than the air outside, so the unit freezing over can happen even if the temperature isn't .

The Trane XR12 was a split-system, outdoor cooling unit capable of reaching up to 13 SEER. This now-discontinued line consists of 12 units ranging from 1.5 to 5 tons, with cooling capacities between 18,000 and 60,000 BTU/H. At the time of manufacture this series was offered with both R410A and R22 refrigerant options; today, R22 has been banned. A Rapidly Flashing Light. Another common light to be aware of on your Trane furnace is a light that flashes very rapidly. This code is the exact opposite of the slow flashing light code, and means that your Trane furnace is turned on and that it is presently calling for heat. The Trane XR12 was a split-system, outdoor cooling unit capable of reaching up to 13 SEER. This now-discontinued line consists of 12 units ranging from 1.5 to 5 tons, with cooling capacities between 18,000 and 60,000 BTU/H. At the time of manufacture this series was offered with both R410A and R22 refrigerant options; today, R22 has been banned. Troubleshoot a **Trane** condensing unit not coming on.
